For each numbered clue from the first column find the matching clue from the last column to form an association with the name of a well known person. The person's last name is represented by a sequence of numbers in the second column that indicate the relative order of the letters that spell out that name. The third column is intended as a space where you can spell out the person's last name. Within each row the first, second, and third entries match. Derive all the names, then enter the first letter of each into Certitude for the final coordinates and hide hint.

1. Mars	2 4 1 3 2 5 4 6	-----	1. blood
2. cold	2 1 5 4 6 3	-----	2. boss
3. red	2 3 1 4 2 5	-----	3. boy
